Always trending forward – we shop the world's markets to give you the latest curated mix of new styles and designs to complement your living space and lifestyle. With 6 conveniently located showrooms across the GTA, each offering the best selection of leather and fabric seating including sofas, sofa beds, sectionals, chairs, ottomans, recliner furniture, and theatre seating, we cater to every room in your home. You can custom order beautiful seating by choosing your fabric, leather and configuration, or take advantage of our renowned "White Glove Next Day Delivery Service" from our large in-stock inventory.

### PART OF THE COMMUNITY

When the Freedman brothers evolved from their small upholstery factory in the mid-1940's to a retail operation in Toronto's 'Junction' neighbourhood, little did they suspect that they would expand to 6 locations across the Greater Toronto Area and assist thousands of families in beautifying their homes with quality, contemporary furnishings.

Since 1948, repeat customers have become our foundation – a source of immense pride for us. We have ongoing initiatives with The SickKids Foundation, The Furniture Bank, Markham Stouffville Hospital Diabetes Foundation, and Women's Brain Health, as well as various schools and children's summer camps. It is both our pleasure and responsibility to contribute to our wonderful community.

### CANADIAN MADE, EH!

More than ever, it's Canada all the way. We are big believers in the integrity of the quality and construction of domestic products. We work hard to search out the best factories that can give us unique and exclusive looks to offer to our loyal customers. Quick delivery, special order options, close relationships and quality merchandise from the best local factories make our seating something you can be proud to live with.

### OUR COMMITMENT TO GREEN

The Chesterfield Shop is committed to your health, focusing on eco-friendly retailing and sustainability for the environment. We do not buy upholstered products offshore where there are very few environmental guidelines, plus we use 'green' filling materials whenever possible with soybean-based foams made from natural seed-based oils to decrease dependence on fossil fuels. Each of our stores participate in recycling programs in a concentrated effort to continually reduce our carbon footprint. We are aware of the future...shouldn't everyone be?
